EXPERIENCES AND PERSONAL INTERESTS

I'm a founding member of the Italian Space and Astronautics Association (ISAA), a non-profit organization devoted to spread the public awareness of space exploration programs and space related technology.

I'm the co-administrator and maintainer of the largest Italian forum community about space (www.forumastronautico.it) and speaker and producer of a weekly Podcast (www.astronauticast.com) about space news, together with other 4 hosts. Our video coverage and commentary of the last 4 shuttle missions gathered hundreds of live listeners from all over Italy that were able to interact and ask questions.

I hold an amateur radio operator license with the callsign IW1GJS and I've been involved in Civil Defense operations.

I have a lifetime long passion for technology in most of its forms and I love travelling, basically anywhere.
